CURSO: Modulo 1. Introducción al desarrollo Front End.

Práctica de laboratorio 2: Creación de estilos a través de propiedades CSS

Objetivos

1. Identificar propiedades del CSS.
2. Crear documentos haciendo uso del lenguaje de Estilos CSSS.

Crear los siguientes estilos, de acuerdo con cada captura de pantalla crear una pagina diferente

1.

This table has	a yellow background
Set a background color	for a table just like you would for any other element

2.

This heading has a yellow background

This heading has a white background

This is a paragraph with a pink background

3.

Here is some gray text

Here is some blue text

Here is some bold green text

There are so many possibilities when it comes to color combinations!

4.

Paragraph with a line over it

Heading with a line through it

Heading with an underline

This link is not underlined. Can you believe that such a thing as non-underlined links exists?!

5.

This text is aligned to the left

This text is aligned to the right

This text is aligned to the center

6.

This text is in a Georgia font

`This text is in a Courier font`

This text is in a Tahoma font

7.

A dotted border

A dashed border

A solid border

A double border

A groove border

A ridge border

A inset border

A outset border

8.

Setting all the padding properties at once is a great shortcut!

But you don't have to set one padding value for ALL the sides, you can set one padding value for the left and right sides and another padding value for the top and bottom sides.

Here is a paragraph with padding set on all sides.

9.

This table	has the **border-collapse**
property	set to "collapse"

This table	has the **border-collapse**
property	set to "separate"

10.

The entire width of the page
